Your lips come as some surprise,
That they would want to come and meet mine,
They never taste like the last time,
Your lips come as some surprise

I was always a special child,
Circuit boards for my insides.
All I dreamed of was flying high,
So your lips came as some surprise.

Your lips come as some surprise,
That they would want to come and meet mine,
They never taste like the last time,
Your lips come as some surprise

I was never one of the boys
Throwing shapes and power ploys.
In your arms warmth I did find,
In your seat I did decline.

Your lips come as some surprise,
That they would want to come and meet mine,
They never taste like the last time,
Your lips come as some surprise

Now that we've sat for a while
You've shown me yours and I've shown you mine
Even after all this time
Your lips come as some surprise.

Your lips come as some surprise,
That they would want to come and meet mine,
They never taste like the last time,
Your lips come as some surprise
Your lips come as some surprise
Your lips come as some surprise
