Velcro on a name tag upon everyone you see
Sorry I'm not perfect just like you
A secret mind to detonate on all of my beliefs
A close-minded hypocrite like you

I don't need a label of classification
Go smoke your brains out and curl up until you're dead
I'm as human as your egocentric self
A generation contradicting me

Let's go
A brainwashed state you fell through
You're never coming back until you're through
A brainwashed state you fell through
You're never coming back until

I don't need a label of classification
Go smoke your brains out and curl up until you're dead
I'm as human as your egocentric self
A generation contradicting me
