Featuring CP  
Prod. by Brall Beats

(Intro)  
Down over me  
You gon lapse all over me

(Verse)  
Hey, renegade going through  
Rockin lays all blue  
I was in a place full of bake, rhythm full of shake  
Cuz she in a place where they try to hate on you  
Soak my vision in the sky, where the is him in a ride  
With a villain to collide  
Martial up right, forced to provide  
So I came alive with a tribe and a vibe  
Who am I? Who are you?  
I'm getting fly with my crew  
She getting high with me too  
And this is why you will lose  
Grindmode focused all night long  
I make a hop to the boxes, smoke that strong  
I broke a lot, pimpin outs got on my arm  
Let's make a pact, give me top, you'll love that song  
Bitches fuck with me, I guess you didn't know  
Got my jewels turned up and the lights low  
Middle eastern chick so she might blow  
Turn the lights down low to see my life glow

(Bridge)  
Me and you together, why we smoke alone?  
Pitch black jewels on, no clothes  
Hair long, skinny waist, smart mouth  
Said she from up top, that ass from down south

(Hook x2)  
Lights down low, lights down low  
Everywhere we go they turn the lights down low  
Lights down low, lights down low  
Everywhere we go they turn the lights down low

(Verse)

Hey, let my dream check the truth  
With a piece of life stickin with his right in the booth  
Hard to see the night, bring him with his blind in my  
grind  
To only find out that it's my time to shine  
I'm better than designers, course of compass decliners  
The feeling I describe when I'm lost in the high  
Divorce full of lies, I'm married and getting gwap  
A choice you could make instead of calling the cops  
Shows overseas, my papers about to pop  
So I hope my girl forgive me for flirting around the box  
Drop it flow, not an line, she drop it low  
Pussy poppin, gave er my confidence, that's my cocky  
show  
I'm the same in the game  
But the fame makes a change but they an't go through  
A boss takin flight, no Jordan sweatsuit but he ball in  
the movements  
Grindmode, we the prime goal and her body's my  
students  
With so much class, so much ass, damn let's do this

(Bridge)

Me and you together, why we smoke alone?  
Pitch black jewels on, no clothes  
Hair long, skinny waist, smart mouth  
Said she from up top, that ass from down south

(Hook x2)

Lights down low, lights down low  
Everywhere we go they turn the lights down low  
Lights down low, lights down low  
Everywhere we go they turn the lights down low

Down low low low low low
