"Found Out About You"

Visit "[Found Out About You](#)" on MotoLyrics.com

All last summer incase you don't recall
I was your's and you were mine
Forget it all
Is there a line that I could write
That's sad enough to make you cry
And all the lines you wrote to me were lies
Months roll past the love that your struck dead
Did you love me only in my head
There were things you said and did to me
They seem to come so easily
The love I thought I'd won
You give for free
Whispers at the bus stop
Well I've heard about nights out in the school yard
I found out about you
I found out about you
Rumors follow everywhere you go
Like when you left and I was last to know
Well your famous now and there's no doubt
In all the places you hang out
They know your name and they know what your about

Whispers at the bus

Well I've heard about nights out in the school yard

I found out about you

I found out about you

Hey

Street lights blink on through the car window

I get to time to often on AM Radio

Well you know it's all I think about

I write your name drive past your house

Your boyfriend's over I'm watching the lights go out

Whispers at the bus stop

Well I've heard about nights out in the school yard

I found out about you

I found out about you

Whispers at the bus stop

Well I've heard about nights out in the school yard

I found out about you

I found out about you

I found out about you
