"Memories"

Visit "[Memories](#)" on MotoLyrics.com

They creep another night
Lock your doors tight
Lock em up real good
Sure to find you, you know they would

So push push your little
Whatchoo frightened for
Nevermind yourself
Cause he comes for you and nobody else

And I said memories
What you really wanna know,
Really wanna know
Really wanna know

And I said memories
What you really wanna know,
Really wanna know
Really wanna know

Break another back
Hear your neck snap
Fell yourself go down
And your brain, take me down

Scratches on the door
To the kitchen floor
Then they hear the scream
When they find you, at the crime scene

And I said memories
What you really wanna know,
Really wanna know
Really wanna know

And I said memories
What you really wanna know,
Really wanna know
Really wanna know

And if you're searchin high

Then I'm searchin low
And if you love me now
Won't you please tell me so
Wont you let me know, oh
That you love me so/?

Search the bloody mess
What you think of this?
This is what you get
Ah lord, this is what you get.

And I said memories
What you really wanna know,
Really wanna know
Really wanna know

And I said memories
What you really wanna know,
Really wanna know
Really wanna know
And I said memories
What you really wanna know,
Really wanna know

Really wanna know
