She wants me to stay all night  
I wont sleep in her bed tonight  
Gives me morning for a cup  
Then my life wont be no drag  
But I know that you'd be  
Alright alright someday that's okay

Don't you worry now I will come around  
One day when it's too late  
So if you find yourself awake  
I hope you have some pills to take  
'Cause I just wanna say goodnight  
And skip your meaningless goodbyes

Say lie if you try

Anytime she's on my mind  
Don't you find the lies  
These things you say may come around  
So don't you put us down

Anytime she's on my mind  
Don't you find the lies  
These things you say may come around  
So don't you put us down

Don't you put us down  
Don't you put us down  
Don't you put us down  
Don't you put us down
