### "Face It"

3 months without a moment to breathe now all you want  
in  
Life is one good night's sleep yeah as soon as you  
think  
You're fine you fall  
So far behind that there's nothing much more you can  
Do but grit your teeth and try to get by fight the next  
New gulf that widens inside and right when you  
thought  
It was near so face it it's time to admit that you want  
To be here well what the  
Hell it's the best cot tease of the year and it's more  
Than what you needed the doubts have all receded it's

Time to get it going I want to get there with you it's  
Coming clearer and it's all  
I wanted to do now all the willful want so here's to  
Feral new beginnings that telegraph their endings  
To daily disabusions and a total refusal to care you're  
Feeling heat-sought and  
So damn glad to be there go join the neophytes and  
haunts  
Philistines and dilettantes the new Elmer Gantry's in  
One feverish race to the bottom it's what you wanted  
it's  
What we're all doing here.
