Finally we kissed under the stars  
Of all the motorways, of all the cars  
Of all the ghosts to drag along  
To all the lifeless bars  
Come on, baby,  
Let's do it again

We'll by and by the true love weighs a tonne  
We tried to lift it once when we were young  
And now we're on the roadside  
We've got smokes and we've got gum  
So come on, baby  
Let's do it again

Love means longing  
I'll be lonesome  
Breeding jealousy  
These things crush me  
"Love" means "fear of losing love"  
I know there's nothing to hold onto, love

Finally we kissed under the stars  
Of all the motorways, of all the cars  
Of all the ghosts to drag along  
To all the lifeless bars  
Come on, baby  
Let's do it again

Come on, baby  
Let's do it again x3

Let's do it again
