Let's work it out
Think where we began
Let's let it end
When it wants to end
Things have progressed
Far from nothingness
I am impressed with how far we've come

Chorus:
Don't stop a good thing
I love what's happening
What we have is so unbelievable
Don't stop a good thing
I love what's happening
What we have is so unbelievable

One or two problems
That are so very small
Give love the credit
'Cause we're not in control
This kind of feeling
It doesn't have to be rational
I've gotta confess we've progressed over time

Repeat Chorus
Higher forces waiting for us to melt
Magnetizing the unlikely
11 courses into this lovely feast
And I'm still hungry

Repeat Chorus
