Enter state
I watched you confirm all of my fears
Have given birth

Offer me
Offer me
Offer me some restraint
Not for this
Not for this
It cannot take place

Let them hear my plea
When your love comes after me
Let them hear my plea
When your love comes after me

No sayin' this
No sayin' this
Why must we try
Metallic sky buries me
I'll soon forget

Let them hear my plea
When your love comes after me
Let them hear my plea
When your love comes after me

Your love is a forgery
A mockingbird to mimic through me
And these eyes, they will not recover
Your eyes have turned to black
Turned to black
Turned to black
Turned to black
