[Verse]

I put my shades on and my gloves on even Stevie be  
wondering what I be on  
First black James Bond, Rewind on the case  
Double O, 13 on your face  
Once I'm out the door ladies yell for more  
And I fit right in like the earth's core  
Men hide their feelings but you, you bury yours  
Stupid I'll tell me what's a cure to ya  
I get the job done, the job I get it done  
Never been a lefty always do the right way  
The light ray, the tight lay, the night day hunting for the  
pay  
Fresh to death here live with some guns from Red Dead  
Redemption  
Ya don't have class ya just have detention  
Grinding if you don't see me rising  
I'll keep your eyes open with staples through your  
eyelids
