Come on say you love me
My comatose nightmare love
Smothered by pain and suffering
Written with lip gloss and blood
Can you feel your heart fading?
Can you feel the change inside?
Calling you like a phantom
Haunting you in the night

Your gonna feel this tonight
Your heartbeats racing fast, faster than light
Your gonna fall in love
There's a killer on the loose
Hungry for blood

This will be the last night baby
I promised to let you go
Falling rays of light befall you
Covers you like blood in snow
Can you feel your heart racing?
Can you taste the rain tonight?
Slowly falling down your lips now baby
Cutting you like a knife

Your gonna feel this tonight
Your heartbeats racing fast, faster than light
Your gonna fall in love
There's a killer on the loose
Hungry for blood

You say you want, you know you want it now
You know you want to die, want to die
You will be mine

Your gonna feel this tonight
Your heartbeats racing fast, faster than light
Your gonna fall in love
There's a killer on the loose
Hungry for blood
