This is your last chance to dance

Come on join me on the floor

cause when the lights go on

youre gonna find me gone

This is your last chance to dance

Well have rhythm romance

Just one dance and nothing more

and then Ill walk you home

You shouldnt be alone

This is your last chance to dance

Ive been watching you all night long

I could be right I might be wrong

You want someone to come along

To get you out of your seat

Get you up on your feet

Get you hoppin to that boppin beat

This is your last chance to dance

Better take it while you can

Before that midnight chime

Why dont we seize the time

This is our last chance to dance

Ive been watching you all night long
I could be right I might as easily be wrong
You want somebody to come along
To get you out of your seat
Get you up on your feet
Slow jiving to that driving beat
This is your last chance to dance
Better take it while we can
Before that midnight chime
Why dont we seize the time
This is our last chance to dance
