[Capital-X] I'm rattling cages of, murder cases I'm,
blowing up stages from, state to state The, truths
contagious I'm, seeing changes Man fuck being
famous, I'm a load up and AIM this I'll make it painless,
without the stainless A crime so heinous, they'll kill me
intravenous Anyone can blame us, even for payments I
wanna over-throw this system that enslaves us They
murder shameless, just like gangsters Just cause he
said she said they hang us A total stranger, points his
finger Now you stuck on the row, and your life is in
danger Filled with anger, that's grown with age Raised
in a cage, on numbered days Mind in haze, you realize
you been played Man in Texas executions are a fucking
plague [Chorus] Stop Snitching, my fingers itching I'm
loading ammunition, like a kid on a mission Stop
snitching, baring false witness I'm ready to still,
anyone acts suspicious Stop snitching, keep ya
distance Don't never forget, that this here's a business
Stop snitching, I'm taking position I'm locked and
loaded, and I'm stalking politicians [Verse 2] I don't
promote violence, I ain't saying get violent But these
snitches need to practice their right to remain silent
The prosecution's smiling, man I can sense they malice
Which keeps the scales of justice completely off
balance Austin to Dallas Harris County be the foulest
Where they'll leave every Black and Latina mama
childless I rock tired-less with a nickel plated wireless
Attack the system like a mutha fucking virus Setting
fire to these liars like a hit man for hire Leave them
expired just like Method Man on The Wire Times are
dire when the state needs to conspire Building capital
cases based on testimony of a liar This is why they set
off bombs on the road side This is why they'll send us
bombs strapped to their own child This is why you
should watch what comes out of you mouth This is how
you can wind up on Texas Death House [Chorus]
