How is it we are here on this path we walk

In this world of pointless fear filled with empty talk

Descend from the ape as scientist-priests all think

Will they save us in the end, we're trembling on the
brink

Men's mighty mine-machines digging in the ground

Stealing rare minerals where they can be found

Concrete caves with iron doors bury it again

While a starving frightened world fills the sea with
grain

Her love is like a fire burning inside

Her love is so much higher it can't be denied

She sends us her glory, it's always been there

Her love's all around us, it's there for you and me to
share

Men's mighty mine-machines digging in the ground

Stealing rare minerals where they can be found

Concrete caves with iron doors bury it again

While a starving frightened world fills the sea with
grain

How is it we are here

How is it we are here

How is it we are here
