"What About The Future"

Visit "[What About The Future](#)" on MotoLyrics.com

I have faith that there is a future for us
Here, as we are, or somewhere else

...Or somewhere else

The future...
The future...
The future...

The future...

I invented all you can acquire in the future

The future isn't what it used to be

I have faith that there is a future for us
Here, as we are, or somewhere else

I want to raise to the future

The future...
The future!

Jet Set Radio

The future...
What about the future

The future...
What about the future

What about the future

The future...
What about the future

What about the future

The future...
