Don't expect me to just stand back
And let this one go by
This kind of love comes along one forever at a time
Girl, I'd be crazy not to try
I've got one chance to make you mine

Two hearts, two minds, almost out of control
But it's like it was planned...and
Two lives, two souls come together that way
When you take my hand
Hard to believe what has begun
I never knew two could become...
One

I love the way it feels each time you look at me
Can't imagine wanting more, you fill my every need
I feel your heartbeat next to mine
It's saying years from now we'll find

Two hearts, two minds, almost out of control
But it's like it was planned...and
Two lives, two souls come together that way
When you take my hand
Hard to believe what has begun
I never knew two could become...
One

Two hearts, two minds, almost out of control
But it's like it was planned...and
Two lives, two souls come together that way
When you take my hand
Hard to believe what has begun
I never knew two could become...
One

I never knew, I guess it's true, two can become...
One
