I'm not sure if it can happen  
My life has gone through a blacken  
Am I really soulless?  
Is my life just pure loneliness?

Is it really possible?  
Is it really probable?  
That I am a soulless person  
To the angels I'm probaly toxin

I have asked this to my friend  
She said iv'e gone around the bend  
Is it true or am I crazy?  
After all these questions you're probaly drowsy

Is it really possible?  
Is it really probable?  
That I am a soulless person  
To the angels I'm probaly toxin

I have done some evil things  
But luckily none of them were killings  
Some people I don't care for  
But some people I treat as my savior

Is it really possible?  
Is it really probable?  
That I am a soulless person  
To the angels I'm probaly toxin

And to the pure I am sorry  
But compared to mine my life's not as starry  
I didn't mean to impose  
I don't think of you as one of my foes  
But after telling you my problem  
I realised I'm not known as scum  
But known as normal  
And that my soul is actual
