Don't wait, by the dark side
Though that's where I'll be
Don't hate me for this ride
I'd buckle my seat
The air has chosen it's ground
So were safe and sound with everything we breathe
The roads are taking us around
With everything we've found and who we are to be

So we'll see
Later in the evening
I made a fool out of me

So we'll see
Looks can be deceiving
How about you release

Your eyes, start to shine
From the tears underneath
Your pride struck and broken
Your not proud of me
The coal burning in my soul, must be so old
My mouth's full of steam
The wrongs and all of the rights,
Will make up my mind, and make a man out of me

So we'll see
Later in the evening
I made a fool out of me

So we'll see
Looks can be deceiving
How about you release
