"Always You"

Visit "[Always You](#)" on MotoLyrics.com

You close your eyes, I watch you sleeping
I think about all you have done
And all that you, mean to me

You search the world, so you can free me
You fight them all, so I can see
We're always safe, safe from harm
Won't break your faith, it's much too strong

It's always you, it has always been you
Through the bad times in my life
All the wrongs that you made right

Always you

Without a word you understand me
When I'm lost you'll find a way
To get me out, out in the light
Your fears despite

It's always you, it has always been you
Through the bad times in my life
All the wrongs that you made right

Always you

I'll try to get better, better for you
Someday you'll need me, I'll be there too
Through tears and through laughter
I'm going to get better, I'll be better soon

Because it's always you, it has always been you
Through the bad times in my life
All the wrongs that you made right
