[Intro] For the times. For the ages. For the struggle  
come on "Whoa" "Mercy mercy" [Verse One] First of  
all, when I'm writin' just displaying my knowledge  
Second, this ain't writing I'm just payin' 'em homage  
Third, I am hip hop The whole land tune in But true  
rhythm and blues is grown man music Rise with me,  
besides the sky's with me Say, "Hi" or "Bye" quickly A  
cycle but why it hits me Analyze rode to the road music  
barbeque is in your head Flow to this, soul music part  
of you The same ? echos through your ears And they  
echo so loud that they avalanche here Moments will  
pass Emotions, the road to music Emotions are rash I'd  
drink other flammable fluid I'm hammering like "Screw  
it" The carpenter's son Gabriels's lessons to music That  
a Rise gonna come I'm gettin' too religious And out of  
tune with niggas That could use a trigger (for what?) To  
pollute a river "Whoa, mercy mercy"
