We're out of talk, I know it's been a while
There's still no cure for you
I tried a lot, the best I could have had
You did not hurry for me

Take my heart with you when you think you're mine
Take my heart with you, yes I know this time

I'll search the world to find you
You're hiding away, just for today
I'll search the world to find you
You're hiding away, you're hiding away

I've traveled far, been losing so much time
I'll keep on searching for you
The sweetest voice, I know I've made my choice
Now will you hurry to me?

Take my heart with you when you think you're mine
Take my heart with you, yes I know this time

I'll search the world to find you
You're hiding away, just for today
I'll search the world to find you
You're hiding away, you're hiding away

Melody, melody, melody, melody

I'll search the world to find you
You're hiding away, just for today
I'll search the world to find you
You're hiding away, you're hiding away

I'll search the world, there ain't cure for love
I'll search the world, there ain't cure for love
I'll search the world, ain't cure for love

I'll search the world, I'll search the world
I'll search the world, there ain't cure for love
I'll search the world, there ain't cure for love
