One small year
It's been an eternity
It's taken all of me to get here
Through this one small year

The hands of time
They pushed my down the street
They swept me of my feet to this place
I don't know my face

Now through the night I can pretend
That the morning will make me whole again
And every day I can begin
To wait for the night again

One more tune
That never never be done
It's just another one for the moon
For the days in ruin
And just today I woke up feeling fine
Like the world was mine
I was clean
And it was a dream

Where out of the blue came you and me
The Wizard of Oz had set us free
And you let me float you to your feet
Just like you believed in me
It's like you believed in...

One small year
I wonder where I've gone
It shouldn't seem so long or so weird
And I was always here
I was always here
It's just one small year
