Usually I'd be there to sleep, baby,
But something's got me dreaming about you,
Wait me on another round.
Feel so real, I can't fight, baby,
I can taste your lips and I can smell your body next to
me,
Keep it going.

It's like I'm in denial, baby,
I just wanna stay right here with you,
Don't go at dreaming in excuse.
I'm feeling things I can't describe, baby,
I can sense our world, just me and you,
This dream is kind of beautiful.

'cause no one's here to see, there's just us.
So come around, boy, put it down on me to rush.
See visions of sounds of your love, that's not us,
I know it's in my mind, but I love what it like.

It's just you and I, with no one to take this love we
create
And I see vision so right, so let's fly away to our world,
baby, tonight.
It's just you and I, with no one to take this love we
create
And I see vision so right, so let's fly away to our world,
baby, tonight.

I'm a real what kind of girl, baby,
So this took me as a surprise, I feel you moving down
the bus.
And there's something we can discuss, baby,
And this is a dream, yeah, I can tell,
The next will gonna be, keep it going.

It's our room, no one's around, baby,
Ain't no pressure, I just wanna stay forever, don't
wanna wake up.
So leave me here fucking around with you, baby.

I know it ain't real, but it feels so right,
Please tell me you ain't gonna go tonight.
This is our world and I wanna fly, I wanna fly.
I've got a vision where we're taking flight,
According to the rail, something ain't right.
You ain't got to go back if you don't like.

It's just you and I, with no one to take this love we
create
And I see vision so right, so let's fly away to our world,
baby, tonight.
It's just you and I, with no one to take this love we
create
And I see vision so right, so let's fly away to our world,
baby, tonight.
It's just you and I, with no one to take this love we
create
And I see vision so right, so let's fly away to our world,
baby, tonight.

I'd like to know, it's good a place like this exists, so
beautiful
Do we have to find our wings to fly away to the vision in
our mind?
