There's something about that girl
I know she's special
I keep her picture close
I show everyone I know

When we make love
It's like making wine
It gets better, better, better in time

Now I, I don't wanna rush
No, I wanna love
I wanna spend my life with you
Let's just take our time
And get it right

You're worth so much more than a night or two
Let's just take our time
And get it right
Let's get it right

I know what turns her on
And I'll go there all night long
I rub her back
I kiss her feet
I give her everything she needs

Now I, I don't wanna rush
No, I wanna love
I wanna spend my life with you
Let's just take our time
And get it right

You're worth so much more than a night or two
Let's just take our time
And get it right

Let's get it right
Let's get it right
Let's get it right
