All of the thorns fall down
Just so you can pick me up
And think about your words and ask you for some help
Whoa, oho, oho, oh, whoa, oho, oho, oh
I know what you're thinking when you turn your hands
upside your side
Grab you while you scream and watch you come alive
Whoa, oho, oho, oh, whoa, oho, oho, oh

From the start we were torn apart
I can't even think for myself anymore
Stay away from me, I wanna tell you everything
But I'm not quite sure where to begin
Don't stray too far from me
The doctor says I need medicine
But all I got right now, is you

I know what you're thinking when you turn your hands
upside
I'm gonna rock this place and the stars collide
And the night's cold
Whoa, oho, oho, oh, whoa, oho, oho, oh

From the start we were torn apart
I can't even think for myself anymore
Stay away from me, I wanna tell you everything
But I'm not quite sure where to begin
Don't stray too far from me
The doctor says I need medicine
But all I got right now, is you

Rip yourself apart break this place gone...
Break the walls... rocks
Stay away from me!
