Making The Same Mistake

This song it don't say I love you
Just says I care
It don't say I have to own you
Just to have you there

It don't say that I don't want to go
I want to stay
We've come a long way out of nowhere
Making the same mistake

You are with the man you love
That's fine but could you please
Leave behind a part of yourself
Just to keep me company

It's been so long I feel so low
I just don't know if I'd could make it
Perhaps it seems now and then
Making the same mistake

Instrumental

You in the nights lying here
Listening for the door
Say it doesn't matter
But it couldn't matter more

I just want to feel you near me
But don't feel you have to fake it
I've been through this all before
Making the same mistake

I've been through this all before
