Crawl thru the night  
I didn't mean to find you  
Laugh when I smile  
I will always find you

I picture your face  
And I can't find fault with you  
Words now lost  
I will always find you

I barely left  
But then still I falter

I barely left  
But then still I falter

I barely left  
But then still I falter

I barely left  
But then still I falter

I barely left  
But then still I falter

I barely left  
But then still I falter
