For a lifetime, I've waited. Suddenly our eyes  
connected. As I see you, like I need to.  
In a moment, we're frozen, and the time stands still like  
I'm dreaming. As I move closer, 'cause I wanna show  
ya.  
Tonight won't be enough, I have to let you know, that if  
you want my love, I'd always give you more.  
Read my lips, don't make me wait. I need you to stay.

Please tell me your name, 'cause I'm never gonna feel  
the same again and I won't forget, this is a night to  
remember. (x2)

You found me, in a mystery. You shot one smile and it  
hit me.  
And I can't help this feeling, my heads flying up to the  
ceiling.  
Now we're dancing, in the spotlight, all the shadows  
seem to move aside.  
And you kiss me, and ooh how you thrill me.

Please tell me your name, 'cause I'm never gonna feel  
the same again and I won't forget, this is a night to  
remember. (x2)

This is the night, tonight. We can remember, forever.  
This is the night, we can remember, forever.

Tonight won't be enough, I have to let you know, that if  
you want my love, I'd always give you more.  
Read my lips, don't make me wait. I need you to stay.

Please tell me your name, 'cause I'm never gonna feel  
the same again and I won't forget, this is a night to  
remember. (x2)
