"Princess Of The Night"

She came from heaven. Secret motion
She is moving like an angel
The magic light of love and passion
She will treat your feelings right
Princess of the night

(Can you feel the love?)
Make my body move to the rhythm of the music
Make my body move (my body move)
To the rhythm of the night
You can feel the love coming up inside me
You can feel the love, make me feel all right

(Get into my dreams)
Get into my dreams. Don't care about tomorrow
Get into my dreams. I'm living for today
Come and share the love. Forget about the sorrows
Come and share the love. And take me far away
