"Just Not You"

Visit "[Just Not You](#)" on MotoLyrics.com

Im foolin myself
Wonderin around jus thinkin about you's
Bad for my health
Doesn't make any sense cause im sure that im happy
With someone else
But it's the but that I don't understand so im askin
Can someone help cause im just not myself

How do I get to used to her touching me
When all I can feel is what we used to be
And watching her sleeping is just not the same
And all I keep thinking is that your to blame

I see it in the way she walks, I see it in the way she talks
And even thought she touched my heart shes just not
you baby
And even though were apart
Still wishin I could press restart
I really gotta face the truth
shes just not you baby

shes not you baby
shes not you baby
no no

its breaking me down
being happy has got me an oscar n all
im wearin this crown
gotta think just before your name comes rolling
out of my mouth
had enough of the hiding and keepin inside
shes got to know cause its starting to show

How do I get to used to her touching me
When all I can feel is what we used to be
And watching her sleeping is just not the same
And all I keep hoping is for you again

I see it in the way she walks, I see it in the way she talks
And even thought she touched my heart shes just not
you baby

And even though were apart
Still wishin I could press restart
I really gotta face the truth
shes just not you baby

I thought that I could just get over you
But i guess its proved, that your whats missing in my
life
And, she just does things that would please any man
Don't understand
Why I cry to be by your side, at night

I see it in the way she walks, I see it in the way she talks
And even thought she touched my heart shes just not
you baby
And even though were apart
Still wishin I could press restart
I really gotta face the truth
shes just not you baby

at night i pray baby

I see it in the way she walks, I see it in the way she talks
And even thought she touched my heart shes just not
you baby
And even though were apart
Still wishin I could press restart
I really gotta face the truth
shes just not you baby

shes not you not you not you not not you not you you no
(repeat)
