"Star Fox"

Space fox, sugar powered galaxy of fun for everyone
It won't matter how you paint it in if all the edges never
change
They'll only want your buttons pressed to go for hyper
space
I'll go autopilot just for you, and you and you

Star fox take what you can bury
star fox eyes bigger than belly

By daylight she might twist and squirm and burn inside
her suit
But by evening she's a rampant beam of fantasy you
can't deny
Star fox is on your mind and his and theirs - but out of
hers
Boldly go where no fox went before we all adore

Star fox take what you can bury
star fox eyes bigger than belly

Star fox take what you can bury
star fox eyes bigger than belly
Star fox clasps a golden cherry
Star fox don't you ever come back down
