Well I wish real hard when I close my eyes

If I could change the world--would I even try

If I found a reason to regain my pride

Oh if I try to believe--try to believe

CHORUS

It's so hard to find an answer

It's so hard to stand alone

It's so hard to find a feeling

That was buried long ago

It's so hard to trust another

When it's easier to hide

It's so hard to believe

Unless we try baby try

If I had a dream and it got away

If I found the words would I know what to say

If I had a chance to be someone else

Yeah if I try to believe, try to believe

CHORUS

If I found a door I've never been through

Would I have the courage to go in without you

(Try To Believe)

And if time runs short would I recognize

The things I couldn't see

If I try to believe--try to believe

If we listen to the voices that were silent for so long

If you thought they went away, well you couldn't be  
more wrong

If I tell you there is something that we've lost but can  
retrieve

If I tell you there is hope, if we try to believe

You remember there's a dream that we long since put  
aside

With the toys that we discarded

And the tears we never cried

We could have had it once again, if we try baby try
