

Casualties, The "Political Sin"

Visit "[Political Sin](#)" on MotoLyrics.com

Helicopters dropped us in the bush
run for cover adrenaline rush
Mortars crash tearing up the ground
bodies lay lifeless on the ground

[Chorus]
Fighting a war we can't win
government commits the ultimate sin

Boys running screaming in fear
wounded screaming dragged to the rear
here comes the enemy with the big guns
we're the wounded the lucky ones

[Chorus]

Political sin send you off to die
can't ask the government any questions why
I don't support a government
that's full of hate and human torment

[Chorus]
