Love let me know, let me know

I said as soon as I figure out this puzzle  
No no no no no no  
You're just let arrive  
Take your seat

As soon as I figure out Russ  
The quicker I can figure out this puzzle that I struggle  
with  
Penthouse dreams, basement realities for the point to  
cash  
Should I pace myself gradually  
Goddamn love give me a sign  
Give me your words, give me your sight, give me your  
mind  
'Cause I'm feeling blind death and dumb  
I saw this on the lean shan please let me run  
With these beats I can speak to the freaks and the nuns  
The rich, the poor can't you see I'm the one  
With this real shit, and I hate to fuck and say  
Do you feel this, yeah  
Just let arrive

Let me know, let me know, let me know  
It's my mother f\*cker real thing yeah  
Alright

I dream better with my eyes open  
I sleep better with my life it's been awaken  
Then I might leave the light soon  
So you could see I'm focused  
This game has a play so all I see is logos  
Then most of you but I just hope the world can see what  
I see  
Hear what I hear, breathe what I breathe  
It's so far fresh idea, but at least I have a year  
At least I have it, at least I have it  
Maybe I can work a little imagine where are the rabbit  
Maybe I can turn a little passion to a palace  
'Cause after all I'm standing on the three point line

wide open  
Pass the palm mother fuckers

Let me know, let me know, let me know  
Is that alright again  
Yeah yeah

Before the sun comes up I gotta love love love  
I started when I pray like... got  
Please don't take it personal I just feel out of place  
My mind is just a vehicle I'm running out of faith  
But please I believe I see the reason that I  
Keep on breathing in my freedom that's why, that's why  
I'm gratefully dead to the life of the impossible  
I never thought I guess so high of the obstacles  
I know it's gonna pay off and it's... it's gonna be the  
comical  
And when I put my mom someone tropical  
These other allusions keep on moving tryin to fuck me  
up  
Where's the forty glover when you need it in this lucky  
cut  
And I wonder if they party up and having screaming  
lucky us

Let me know, let me know, let me know  
Yeah, I wonder if they party up and having screaming  
lucky us  
Love, let me know  
I just let it out  
Love, let me know, let me know  
Love, let me know, let me know
