It all begun
When we first met
You caught my eye
By surprise
Now couldn't help but smile every time you walk by
And even though we just met
Inside I get butterfly

Chorus:

If only you knew I was in love
With you yea you
If you only you knew I was the one
That was crushing so much on you
We could run all day together
Make it through all kinds of weather
If only you knew I was in love
With you with you yea you

My heart beats faster
Every time I see your face
Just hearing your voice
Makes my day

Chorus:

If only you knew I was in love
With you yea you
If only you knew I am the one
I would do everything for you
We could watch the stars together
Make promises that would last forever
If only you knew I was in love
With you with you yea you
Oooo oh oh ohhhh
Yea you yeaaaaa

Refrain:

If only you knew I was in love
With you

If only you knew I was in love
With you

If only you knew I was in love a
With you yea you
If only you knew I was the one
That was crushing so much on you

We could run all day together
Making it through all kinds of weather
If only you knew I was in love
With you with you
We could watch the stars together
Make promises that will last forever
If only you knew I was in love
With you with you yea you
