G8's got a meeting fortified up in the hills  
Making lot's of promises they'll never fulfill  
Claiming that they're working for the public will  
Talking about making lots of changes  
They're offering concessions, exploiting our demands  
Knocking scraps off the table just to sit back on their  
hands  
Changing names of policies to cover up the scams  
Securing future profits and investments

Don't settle down til you get what you need  
Don't settle down til you get what you need  
They' always use some bait to tempt a movement to  
concede  
Don't stop til you get what you need

Paper said they're gonna dump the debts over seas  
Just like in the 80's with the SAPs  
Terminating cultures with the terminator seeds  
Just a bunch of trojan horse sh\*t  
So up until the lawsuits are settled in the courts  
They'll be fixing up their image in their annual reports  
But the real plan they're drafting in this mountain  
resort  
Is another 100 years of oppression

Don't settle down til you get what you need  
Don't settle down til you get what you need  
If they push through your picket line then try a blockade  
Don't stop til you get what you need

The ocean tide is rising it's about to overflow  
The trees are disappearing faster than they can re-  
grow  
The ozone hole is bigger than it was 5 years ago  
Corporation's pushing to the limit  
There's toxins in the water from the river to the sink  
Carcinogenic chemicals, dangerous to drink  
The life-system combatting unravelling  
Reminding us we're fighting for survival

Don't settle down til you get what you need  
Don't settle down til you get what you need  
Climate's getting warmer and it's fueled by greed  
Don't stop til you get what you need

More cash goes, less cash comes  
The rich getting richer, the poor getting numb  
History repeating playing re-runs  
The wages going downwards just don't seem to  
correspond  
With the trickle down theories they base everything  
upon  
It's a free-trade fantasy, a Neo-liberal-con  
Just another excuse to make profits

Don't settle down til you get what you need  
Don't settle down til you get what you need  
Dump the bosses off your back and let the people take  
the lead  
Don't stop til you get what you need

Don't settle down til you get what you need  
Don't settle down til you get what you need  
We're 6 billion strong, they're 8 weak  
Don't stop til you get what you need
