What goes around comes around  
That's a time-tested fact  
That's true in Afghanistan  
And it's true in Iraq  
You may have threw the first fist  
But will you throw the last?  
Cuz you shot first  
Now they're shooting back

What goes around comes around  
Cuz you propped up Saddam  
Now it's U.S. soldiers getting hit with improvised bombs  
It's not the Baathists, not Al Qaida  
It's working people's hands  
Planting the seeds of your destruction

What goes around comes around  
A time-tested fact  
That was true in Afghanistan  
And that's true in Iraq  
You may have threw the first fist  
But will you throw the last?  
Cuz you shot first  
Now they're shooting back

What goes around comes around  
Cuz you prowled from pole to pole  
Destroying everything you touched  
For labor, land and gold  
In the Santa Maria or the Enola Gay  
You got rich because other people paid

What goes around comes around  
Cuz you can't erase your past  
You made your wealth from Slavery  
It's still socially intact  
But builders can break down everything they've built  
And you can rest assured that one day they will

What goes around comes around  
A time-tested fact

That's true in Afghanistan  
And that's true in Iraq  
You may have threw the first fist  
But will you throw the last?  
Cuz you shot first  
Now they're shooting back

What goes around comes around  
And it stings when it hits  
And your in too deep  
To not sink with the ship  
Ain't no excuses to pardon you  
This world is what you've made it  
Your bred this hate now gonna have to face it

What goes around comes around  
In such a burst of time  
Now the world you tried to conquer  
Is creeping up behind  
As Mussolini learned before  
You reap what you sow  
You will suffer the fate you've imposed
