S-man
"Make It Right"

All you gotta do is make right
All the things gone wrong
If you really think you've got might
Tell her that you were wrong

Go down on your knees tonight
And tell her you were wrong
Promise never to lose sight
Of all things you mean right

All you gotta do is make right
Every bit of hurt you've caused her
Tell her that she was right
And you never meant to hurt her

Look her straight in the eyes
And tell her you're sorry
Never look away from her eyes
As you tell her not to worry

All you gotta do is make right
All those times you were away
Tell her when you see her tonight
That you'll never stay away

You've really got to make right
All the little things gone wrong
Take her a bunch of flowers tonight
And tell her you'll be strong

The time has simply come
When she can hurt no more
Together you'll ride the storm
And stay apart no more

All you gotta do is make right
All the things you mean right
From now, no more fight
And love will be your light

All you gotta do is make right

All the things you feel right
Make the sun bright
And dark nights light
