Some hearts don't get far
Like a shootin' star they burn out fast
Some loves are like worn out shoes
You got used to not made to last

But our love's as big as the sky
A million miles long and just as wide
Deeper than the deepest will
One little push and then I feel

And I'm still
I'm still fallin'
Fallin' for you darlin'

Every day, every way, everything you do or say
Hear me callin'
I'm still fallin' for you

Your kiss gives me a thrill
I can't get my fill of this desire
I know a touch takes me straight to the moon
Like a hot air balloon we go higher and higher

I don't need no parachute
'Cause I got you to hold on to
They say what goes up must come down
But I'm nowhere near the ground

'Cause I'm still
I'm still fallin'
Fallin' for you darlin'

Every day, every way, everything you do or say
Hear me callin'
I'm still fallin' for you

They say what goes up must come down
But I'm nowhere near the ground

'Cause I'm still
I'm still fallin'

Fallin' for you darlin'

Every day, every way, everything you do or say
Hear me callin'
I'm still fallin' for you

I'm still
I'm still fallin'
Fallin' for you darlin'

Every day, every way, everything you do or say
Hear me callin'
I'm still fallin' for you
I'm still fallin' for you

I'm still fallin'
I'm still fallin'
For you darlin'
