A pale moon rises  
Above iron cyberfields  
Reflects a crimson light  
That leaves the veins of fright

Electric lonely world  
Stars carried by fictitious birds  
Through darkest cosmic seas  
In emptiness they bleed

You need  
Fast Blast in techno beats  
Fast Blast is all you need  
Raise your fists in the air  
And scream together  
Fast Blast

Fast Blast [2x]

Spacegothic horny girls  
Should be immortal queens  
To stop the bloody streams  
And fuck in blasting beats

Fast Blast in techno beats  
Fast Blast is all you need  
Raise your fists in the air  
And scream together  
Blast  
[3x]
