Be still my heart  
Lately its mind is on its own  
It would go far and wide  
Just to be near you  
Even the stars  
Shine a bit bright, I've noticed  
When you're close to me (tell me how)  
Still it remains a mystery

[CHORUS 1]

Anyone who seen us knows what's goin' on between us  
It doesn't take a genius to read between the lines  
And it's not just wishful thinking or only me who's  
dreaming  
I know what these are symptoms of  
We could be in love

Hey hey hey hey

I ask myself why  
I sleep like a baby through the night  
Maybe it helps to know  
That you will be there tomorrow

Don't open my eyes (don't open my eyes)  
I'll wake from the spell I'm under  
Makes me wonder how, oh, tell me how (tell me how)  
I couldn't live without you now

[CHORUS 2]

And what about the laughter, the happy ever after  
Like voices of sweet angels calling out our names  
And its not just wishful thinking or only me who's  
dreaming  
I know what these are symptoms of  
We could be in love

[BRIDGE]

All my life, I have dreamed of this  
But I could not see your face  
Don't ask why (don't ask why) two such distant stars  
Can fall right into place

[CHORUS 1]

Anyone who seen us knows what's goin' on between us  
It doesn't take a genius to read between the lines  
And it's not just wishful thinking or only me who's  
dreaming  
I know what these are symptoms of  
We could be in love

[CODA]

Oh, it doesn't take a genius  
I know what these are symptoms of  
We could be (we could be), hey hey (hey hey)  
We could be (we could be), we could be in love  
We could be, we could be in love
