I've gotta tell you 'bout the way I lived
They used to treat me with dignity
My position was where you are now
This city used to be so good to me

Don't you wanna come along?
There's something i must show you
Don't you wanna come along?
Don't you wanna come along?

I blew it all you knew how things can be
It all happens with the speed of light
Some people say I've got myself to blame
Maybe I will understand in time

Don't you wanna come along...

Take my hand and see the jetslide where I fell
Lend me your ear for a while...

Yeah, I was one of the idle rich
I used to come here almost every day
I guess they told you all you need to know
But don't believe a single word they say

Don't you wanna come along...

Take my hand and see the jetslide where I fell
Lend me your ear for a while...
