I've got something hanging over my head
My mouth betrayed me yesterday
Don't believe everything I say
Words are bullets and I shot myself

Aaaah...You got it all wrong
Aaaah...You got it all wrong

Can we forget that conversation
I made it all up just to get a reaction
It doesn't matter what I said to you
Being right you still can lose

Aaaah...You got it all wrong
Aaaah...You got it all wrong...

But I said to you what I said to you and there's nothing
we can do
There's no way that I could make it up to you
Said is said done is done and nothing matters now
There's no way that I could set things right again no!

All alone in the middle of a crowd
A little too much and a little too loud
But I don't need to apologize
'cause I don't lie
No I don't lie... that much!

Aaaah...You got it all wrong...
