I know where you live
Yeah I know where I can find you
And I know where you've been
And I know that I've been lied to
Cause I was in the middle of my shower
When I heard your house was falling down
Decided I'd believe it when I see it
And if it was true I'd hear in town
You were probably lighting candles to conspire
And now your house has caught on fire
That twisted house that everybody knew
So I'm never gonna go to never gonna go to
Never gonna go to that place again
No I'm never gonna be there cause I don't wanna
Be there
I'm never gonna go there again
Never again

I know what you are
You're a very special person
And a most interesting
You really make me wanna go to sleep
That's why I never wanna see you I never wanna
See you
I never wanna see you again
Never again

I'm never gonna go to never gonna go to
Never gonna go to that place again
No I never wanna be there
I'll never wanna be there
I'm never gonna go there again
I never wanna see you I never wanna see you
I never wanna see you again
Cause you're twisted so twisted
And I never wanna see you again
