Flex on me? It's mission impossible
You'll end up toe-tagged, stretched out in a hospital
Casualty lost in the cesspool
You won't even be found by search and rescue
You're way out of position whenI'm movin' in
And in harms way so don't start with me
This message will self destruct for the corrupt
MC's who are in this only for the buck
You're in grave danger. I explode like shrapnel
The code name's V for the foes that can't spell
Your rhymes are weak on any looseleaf
The bass is hittin' hard every time I speak

Under no condition, can you topple my stand
When I flow everything goes according to plan
The operations a go to wreak havoc on foes
Like a spy infiltratin' your organization
My scripts encrypted, so you can't decipher
In any cipher, pick you off like a sniper
Blow you off the grid cuz you can't manage
The rest of your team is collateral damage
Destroy the inferior from the interior
Drop a few bombs and scorch your exterior
Cuz you're traipsin' on treacherous terrain
Exposin' you rogues is my aim

How do I rectify? The status is classified
So you better fallback when I rip raw raps
Execute precisely each time that I'm rhyming
Decisions split-second with pinpoint timing
My accuracy in this medly is deadly
Don't deploy like a decoy - just advance steadily
Time for you to abort and take flight
Or the scope will put you in my sights
Try to be a hero and I'll put you in traction
You and your crew will be missing in action
This is for my nemesis. Evacuate the premises.
Mission accomplished. Here comes my accomplice
