"Next November"

Visit "[Next November](#)" on MotoLyrics.com

We are going down again
And we are floating down again
And you, you stay in front ... and you smile

The door, the door is closed again
And the window in my head is clean
And we feel - what we feel - what we felt

We felt the next todays will go down
We felt the next todays will go down, will go down

But I say, but I say, but I say, but I say

Next November ... we'll go away
Next November ... you will feel no pain
Next November ... we'll go away ... away, away

The sun is going down again
And the warmth of the summer is away
And we feel - that we feel - what we feel
