You're waking up
A part of me I've never known
And I've never felt
So invincible

What took you so far away?
Lost for tonight again
That's what you wanted
Your arms to your side again
Again

Just take away the words I say
Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try to stop you

You hold the rights I'll never own
And I've never felt so alien
Don't tear us apart again
What is the use of it
Well okay it's nothing
It's all chemistry of a car crash

Just take away the words I say
Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try so you'll stay
This time I won't try
And I won't change this time
I won't try to stop you

It's all chemistry of a car crash

Just take away the words I say
Cause I know that you don't feel the same
Just go and say what's in your head
And I won't try so you'll stay
This time I won't try
And I won't change this time
I won't try to stop you
