Can we get away? Far away
Let's leave this place
Will you come with me?
Are you down to turn your world around

It's you and me tonight
Leave it all behind

Let's go for a ride

Say goodnight to gravity
Hold on to me
The passing stars light the way
The future's here today
It's you and me tonight
Leave it all behind

Get in my rocketship
We'll leave the light of day
Staying on the turning away
There's no tomorrow

Just today
Together we will follow, fly away
Never mind tomorrow
Just today

Leave it all behind
Let's go for a ride
