I sat at the door of the pearly gates  
I tried to wait  
Oooh oh  
You don't know who I am or why I am  
Why don't you understand  
That this blackness hurts  
That when I close my eyes it's worse  
That's why I go to sleep  
To black out, I pass out from doubt  
Oooh ohh  
I don't want to know why the sky goes blue  
Then the sun is the moon  
And everything looks so dark in this room  
So I go to sleep  
Till I'm deceased  
I want you to care just say you'll be there  
When I fall  
Someday I will handle it all  
But when I drop the ball  
I keep saying I saw  
The world as a girl, as a mountain, as a stone  
But I'm alone

I've seen a tornado fall from the sky  
I've seen a fire break down and die  
I've seen the clouds take form  
I've seen my whole damn life reborn  
I built this wall  
I want it to fall  
I wanna know my name  
But I didn't want to know it all

I gotta family, but god damn  
They never really did understand me  
They put this front  
Only to tell you what they want

So I built up a small wall for two  
And I thought the other part of the wall, was for you  
In this small town, there's only one horse  
And I need out so I made my own course

I've been unhappy and I've met it's course  
I want you to know I was just looking for more  
And I've know your hate, held onto it as weight  
I let you bite me then walk over my fate  
I've let the ants hold me down  
When all I could hear was a single sound

My sisters bitter  
Put me to blame  
Cuz it took too long for me to change  
I built this small wooden box for the rain  
So when it all falls down it's all the same  
As I knew you

Every color in the past grows bold  
The more I know, the more I grow  
Someday I will show  
You what it all means  
But today I won't  
But today I won't  
Noo  
So say goodbye  
To the bad guy  
To every bad thought  
To every last stop  
I will never drop  
So when I close my eyes  
Just let me be  
Don't let them take that part of me  
And then I can wake up...  
And then I can wake up...  
And then I can wake up...
